Fused Output

PRO-GROW MODEL GC-24 RECYCLING SEQUENCE TIMER

ONE CONTROL FOR ADJUSTABLE "ON" AND "OFF" REPEAT TIMING CYCLES

Dependable proven PRO-GROW quality timers are ready to use - just connect the 24V input and 24V output wires and set the control knobs to the desired "on" and "off" times.

Connect the output to controlled devices such as **MISTING SYSTEMS, DRIP WATERING SYSTEMS**, etc. for **PRECISE TIMING CONTROL**. Hookup to control and load can be low voltage wire.

Turn on the power switch and the control will continually cycle the "on" and "off" times sequentially until the power switch is turned off.

Pilot lights indicate "power on" and the "on" and "off" time of the controlled device.

The controls are built in a heavy gage rugged steel enclosure with Factory Baked enamel finish to withstand the greenhouse environment.

Other timing cycles are available- Contact Factory.

These timers can also be used for a wide variety of other timing applications.
